## **Great Transformation: Driving Forces of Global Change**

Change is the only constant in the universe.

In our exponentially changing world, what are the driving forces behind such change?

Are we aware of where we are headed or are we driven into an unforeseen future?

Are we part of that change or merely an audience to it?

With these questions in mind, we will explore this multi-dimensional change in diverse fields such as technology, digitalization, climate change, security and stability. Our speakers will offer their perspectives into finding creative solutions that serves the highest good of all.
